Abstract

Estimate

Contents

1	Idea	2
2	Literature Review	2
2.1	First strand of literature	2
2.2	Second strand of literature	2
2.3	Research gap	2
3	Theoretical Framework	2
4	Data	2

1 Idea

2 Literature Review

2.1 First strand of literature

Summarize the first group of papers here. Compare their arguments, methods, and findings.

2.2 Second strand of literature

Summarize the second group of papers here.

2.3 Research gap

No research

3 Theoretical Framework

Ideas:

- Triple differences:

$$DDD = [\Delta P_{\text{prime}} - \Delta P_{\text{ordinary}}]_{\text{HNWI cities}} - [\Delta P_{\text{prime}} - \Delta P_{\text{ordinary}}]_{\text{other cities}} .$$

4 Data

Accetturo et al. 2014 refer to Italian Land Registry data. LRO divides the data into "microzones" that are homogeneous in socioeconomic features. Housing prices in district are computed as average of microzones, weighted by population.
