

INDEX

A

Actual tax systems

- accounting methods, 414
- benefit principles, 460–461
- characteristics, 446
- first order approximation, 398–399
- individual incomes, 395–396
- of OECD countries, 394–395
- policy debates, 446
- vs. optimal tax system, 407, 459

Administration and compliance, 52, 54

Adverse selection

- vs. advantageous selection, 125–127
- annuity markets, 132
- defined, 128
- equilibrium, 118
- evidence of, 131–134
- key feature, 119, 121
- marginal cost, 120
- policy analysis, 123, 185
- private market and, 140–141, 168–169, 176
- tax subsidies, 121
- testing, asymmetric information, 128
- underinsurance and, 120
- welfare costs of, 115, 120–122, 134, 138

Agglomeration

- advantages, 301
- capital base, 301–302
- economies, 206–207, 216–217, 244
- stock effects, 301

Alternatives to welfarism

- compensation principles, 461
- equal opportunity principle, 462
- generalized social welfare weights, 463
- libertarianism, 460–461
- Pareto Principle, 459–460
- Rawlsian Criterion, 460
- responsibility principles, 461

Asking, for charity, power of, 32, 37

Atkinson-Stiglitz Theorem

- estate taxation, 352
- social welfare program, 446
- supplementary commodity taxation, 446

Audience effect

public broadcasting, 31

television commercial, 3–4

B

Bequest motives

- accidental, 340–341
- behavioral responses, 377–378
- empirical observation on, 381
- intentional, 340
- intergenerational links, 339
- normative issues, 341
- single generation, 337
- types, 350–351

Budget constraint

- for individual givers, 16
- utility function, 3

Bundled donation and consumption, 43

C

Capital gains taxation

- carryover basis, 334–335
- death and, 360–361, 364
- gifts and, 366–367
- implementation features, 330–331, 358–359
- timing of, 363
- unrealization of, 375

Carnegie conjecture, 369–370

Charitable foundations

- in Canada, 8
- Clinton Global Initiative (CGI) as, 9
- endowments of, 13
- share of giving, 7
- strategic interactions of, 3
- tax laws for, 8–9
- tax *versus* non-tax returns, 23, 25–26
- tax-deductible donations, 4
- total contributions in 2010, 6, 9–10
- in U.S., 8

Charitable giving

- adult habits, 42
- asking, avoidance of, 37
- by for-profit company, 43
- charity auctions, 39
- conscious and unconscious responses, 4

- country differences, 5
- to disasters, 42
- individual economic decision, 3
- motivational crowding, 40
- peer pressure, 41
- primary properties, 2
- religious and non-religious aspects, 41–42
- social exchange, 3–4
- strategic interaction, 3
- Charities Aid Foundation, 5
- Charity auctions, 39
- Cities
 - crime rates, 201, 207, 211–212, 228–229, 231, 243
 - deferred compensation, 241
 - factor mobility, 196
 - health care, 197, 209, 240
 - investments, 241
 - poverty rates, 207
 - public hospitals in, 209, 240
 - water management, 198–199, 205, 230–232, 244
- City councils, 247–248
- City mayors, 242, 247–248
- Crime rates, 201, 207, 211–212, 228–229, 231, 243
- Common consolidated corporate tax base (CCCTB), 314
- Consumption-smoothing effects, 144, 149, 150–151, 155, 163, 166–167, 174, 181, 183
- Corporate giving, 7, 43
- Corporate tax rates, 258, 260, 288–289, 312, 314
- Corruption, 94–95, 97–98
- D**
 - Deferred compensation, 241, 246
 - Direct taxation, 330–331
 - Disability insurance
 - in Canada, 152–153
 - empirical evidence, lack of, 182–183
 - externalities, 170
 - labor force participation, 151, 158
 - risk factors, 134, 154–155
 - in U.S., 171
 - welfare consequences, 183
- E**
 - Economic development
 - fiscal capacity and, 74
 - taxation, 53
 - Entrepreneurship, positive effect, on taxation, 371
 - Estate taxation
 - Atkinson-Stiglitz theorem, 352
 - charitable bequests, 332, 374, 376, 379
 - distributional implications, 376–377
 - during death, 330, 364–365
 - externalities from giving, 347
 - and gift tax, 366
 - giving externalities, 349
 - inheritance and, 354, 369, 371
 - linear analysis, 353
 - liquidity constraints, 371
 - mortality risk, 363
 - of living population, 365
 - optimal formula, 352
 - rate of return, 362–363
 - redistributive context, 344, 350
 - size of estate, 360
 - tax payers decision, 359–360
 - wealth distribution and, 332–333, 380
 - Education investment, 196–197, 199, 202, 228, 230, 232, 235
 - Elections, 246–248
 - public sector unions, role in, 248
 - Emotional appeal, on disaster, 3–4
 - Endogenous wages, 454
 - Endowments, 8–9, 13, 17, 28
 - Exogenous income, 369–370
- F**
 - Family taxation, 450
 - children, 452
 - couples, 450
 - Family firms, positive effect, on taxation, 371
 - Fiscal capacity
 - components of, 102–103
 - costs of, 66
 - creation, 52, 72
 - endogenous analysis, 52, 76
 - first order conditions, 72–73
 - formal, 97–98
 - government's motives, 55–56, 61–62, 69
 - income inequality, 89
 - indicator, 60–61
 - informal, 97
 - investments in, 54–59, 72
 - public spending, 71
 - time-series comparison, 57–58
 - types of, 75, 89–90

- Foreign direct investment
 - bidding for firms (by countries), 302–304
 - external benefits, 303
 - indigenization effect, 282
 - residence principle in, 266
- Formula apportionment, source taxation, 314
- Fundraising
 - bundled donations and consumption, 43
 - charity auctions, 39
 - donors class, 44
 - for disasters, 42
 - giver's mind, 34
 - giving habits, 41
 - institutional philanthropy, 44
 - Internet's role in, 45
 - issues, 41
 - leadership givers and, 19
 - matching grants, 21
 - models, 26
 - motivational crowding, 40
 - peer pressure, 41
 - role of charity in, 25
 - rule of thumb, 18–19
 - social pressure, 36–37
 - society's benefit, 38
 - strategic interaction, 3, 44

G

- Giver's mind, 34
 - asking, avoidance of, 37
 - fundraising effects, on society, 39
 - social costs and pressure, 36
 - see also* Willingness to give
- GDP percapita, Penn World Tables, 58–59

H

- Health care, 197, 209, 240
- Housing
 - policies, 236, 238
 - quality, 216–218, 220, 224
 - taxes, 216–217, 219–220, 223, 225–227
- Housing taxes, 216–217, 219–220, 223, 225–227
- Human capital, 207–216, 224–225, 227

I

- Income shifting
 - distributional reasons, 419, 421
 - finite and infinite elasticity, 420
 - labor income, 419–420

- negative, 420
- sources of income, 419

Income tax

- compliance issues, 75–76
- fiscal benefits of, 77
- in developed countries, 71
- introduction, effects on, 75
- large-scale compliance, 56–57
- time-series pattern, 59–60

Individual giving

- data analysis of, 12
- households role in decision making, 14
- leadership gifts, 18
- preferences, 11
- price experiments on, 16
- salient factors, on incentives, 21
- Save More Tomorrow, 20

Information exchange

- divergence of interests, 309
- harmful impact, 307
- residence principle, 307
- tax competition and coordination, 302
- tax havens, closing down, 313–314

Infrastructure investment, 232, 243–244

- cost-benefit analysis, 244

Inheritance tax, 330–331, 333, 359, 371, 378–379

- see also* Carnegie conjecture
- accounting methods, 351
- on labor supply, 368

In-kind transfers

- benefits of, 448
- non-cash benefits, 448–449

International tax competition

- endogenous savings, 297
- governance structure, impact on, 284
- in preferential regimes, 304
- infinitely repeated games, 295
- internal governance structure, 286–287
- Kanbur-Keen (1993) Mode, 274
- multiple instruments of, 283
- partial list, 258
- policies, 260
- portfolio diversification, 281
- profit shifting in, 313
- sequential decision making, 277–278
- statutory rates, 260
- theoretical perspectives, 260
- time consistency, 297

uncoordinated actions, impact on, 262
welfare perspectives, 317, 320

K

Kanbur-Keen model, tax base, 274

L

Labor income, 64, 69–71, 88, 105–106

Labor supply concepts

Envelope theorem, 410
extensive margin, 409
intensive margin, 408
tax reform welfare effects, 410

Land taxes, 219–220, 222, 224–225, 233

Land use, 203, 211, 222

Leadership gifts

by fundraisers, 18–19
individual givers, 18
large donors, 29
matching grant, 20

Local governments

budget rules, 241–242
central tasks of, 195–197
decentralization effects, 212
during recession, 197, 235
failures, reasons for, 214
functional authorities, 196, 199
hospitals and, 240–241
independent budgets, 240
institutions of, 246–247
intertemporal aspects, 250
local taxes, 237
operating deficits, 241, 243–244
property tax, 233
public services, provision of, 196
redistribution and incentives, 235
schooling and, 243
spending, 199, 204
and finances, 216
in US, 196
total revenues, 234

M

Market sectors

econometric evidence, 23
field experiments, 26–27
supply side theories, 22

Matching illusion, 16–18

Migration

poverty traps, 248
redistribution and, 236

Minimum wages, labor market, 456

Mobility

local governments and, 196
local spending, impact on, 158, 227
Ramsey rule, 197
social welfare services, 197, 236
urban governments and, 196, 248

Motivational crowding, 40

Municipalities, 241

N

Nash equilibrium

first-order condition, 268–269, 281–282
in preferential regimes, 305–306
iso-welfare curves, 272, 278
Kanbur-Keen model, 274–275, 288
non-cooperative tax rate, 293, 295–297
Pareto effect in, 269, 287, 290, 295–296
reply functions, 278, 289–290
social optimality properties, 268–269

New Deal, 197, 213–214, 237–239, 249

No Child Left Behind Act, 235

Non-tax revenues, 95

O

Optimal income taxation

history, 401
issues, 354
relative income concerns, 453

Optimal labor income tax theory, 454

Optimal linear taxation

basic model, 410
formula, 413
median voter model, 414
random earnings, 413
rate, 411–412
revenue maximizing rate, 411

Optimal nonlinear schedule

continuous model of Mirrlees, 434
discreet models, 438
marginal tax rate, 436
numerical simulation, 437
top rate, marginal tax, 437

Optimal nonlinear taxation

cross-country evidence, 432
government schedule, 421
international migration, impact on, 428

- international mobility, 430–431
 - intuitive derivation, 421
 - micro level reforms, 430
 - rent-seeking effects, 425
 - standard model, 422
 - time-series evidence, 432
 - top rate, 422–423
 - trickle up and down rate, 427–428
 - Optimal transfer profiles
 - extensive margin responses, 441
 - intensive margin responses, 439
 - Mirrlees model, 439–440
 - policy practices, 443
 - Optimal transfers in recessions
